VIPRO® Front Screen L

The VIPRO® Front Screen has been specially developed for home cinema use.

The screen is manufactured using a special etched structured surface developed for front projection with a combination of specialist foils in the interlayer.

The surface of the glass when the projector is off has a grey effect this is because the grey colour enhances the contrast of the picture.

The standard size for the VIPRO® Front Screen L is 90" picture at 16:9 giving a screen size of 2000mm x 1100mm (other dimensions are available on request).

The VIPRO® Front Screen L is delivered with a TÜV approved mounting set. This spaces the board 12mm off the wall so creating a 'free-floating' screen.
